

SHAUN LOBSINGER

19826 W. Lincoln St.

Buckeye, AZ 85326

T: 480-433-6235

E: shaun.lobsinger@gmail.com

W: <https://shaunlobsinger.com>

Objective

Innovate exciting web products with an obsessive focus on user experience within an inclusive, respectful, and fun team.

Education

MS - Human Factors (Applied Psychology) / 2015

Arizona State University: Ira A. Fulton Schools of Engineering, Mesa, AZ

BS - Psychology / 2011

Arizona State University: College of Liberal Arts and Sciences, Tempe, AZ

Skills Summary

Coding

HTML, CSS, SASS, Node, MySQL, JavaScript, Bootstrap, React, Redux.

Tooling

Git, Webpack, VS Code, NPM

Experience

GoDaddy

Software Developer IV | 1/2017 – Present

- Build and maintain React based front-end applications with a focus on performance
- Develop scalable REST micro services
- Team scrum master
- Work closely with PMs to align priorities and acceptance criteria
- Onboard and mentor new hires and interns

Arizona Federal Credit Union

Senior Web Application Developer | 6/2013 – 12/2016

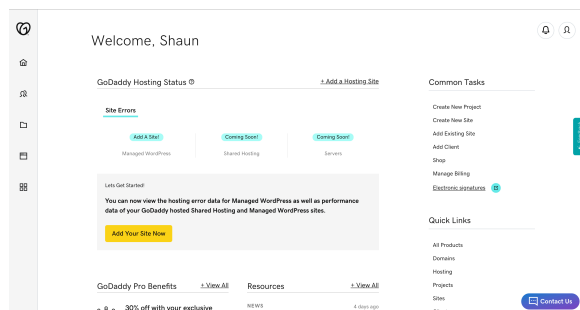

- Develop business critical PHP based applications with Laravel and Vue.js
- Introduce GIT version control to the organization
- Implement CI/CD pipeline through Atlassian Bamboo and Bitbucket
- Wireframe user experiences

Projects

GoDaddy Hub (2020 - present)

<https://hub.godaddy.com>

Assisted in launching the Hub, a specialized experience for GoDaddy Pro users. Hub provided both a management application as well as a custom header which follows the user across different GoDaddy applications. I drove integration efforts to move the header into productivity.godaddy.com, as well as adding new functionality such as a sub navigation. I was instrumental in contributing to multiple micro service and micro UI apps. I have collaborated across teams to provide better onboarding ramps to the Hub, for example, I implemented automatic opt-in after checkout.

Technologies:

- Node
- React
- Single SPA
- Express
- Gasket

Quick Activation (2019)

A small React based drop-in component allowing developers to easily allow a user to activate email from any GoDaddy application.

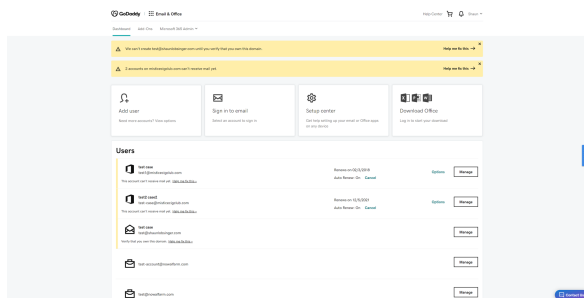

Technologies:

- React
- Webpack
- NPM
- CORS
- Node

Productivity Email Management Panel (2017 - 2021)

<https://productivity.godaddy.com>

Productivity Panel is a React based email management application which abstracts the complexity of setting up and managing email products at GoDaddy. I've contributed to multiple aspects of the product including setup flows, email migration, and mailbox management. I drove efforts to migrate the productivity API from legacy PHP to a more performant Express.js application.

Technologies:

- PHP
- Node
- React
- Redux
- Webpack

Arizona Federal Redesign (2016)

<https://web.archive.org/web/20180224041255/https://arizonafederal.org/>

A complete redesign of the Arizona Federal website to modernize the site and add new functionality. I was responsible for migrating to a new hosting service, shift from ColdFusion to Laravel (PHP), and bring the designer's wireframes to fruition.

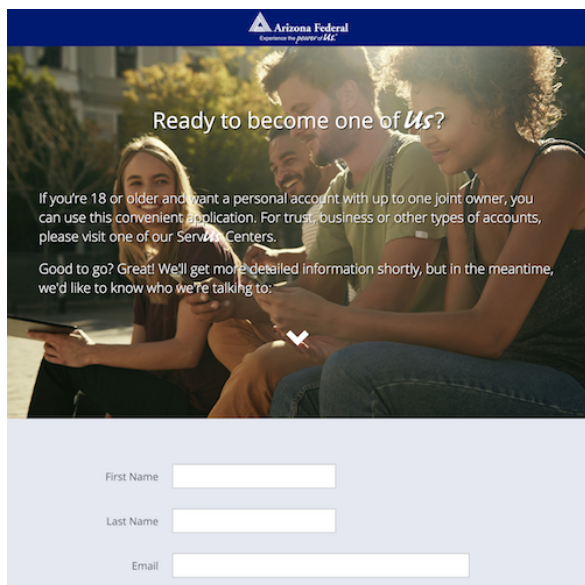

Technologies:

- PHP (Laravel)
- Vue.js

Arizona Federal Online Membership Application (2015)

<https://join.arizonafederal.org>

I developed an online membership application allowing users to join the credit union from the internet for the first time. Applicants were able to fully complete an app and submit to a reviewer for intake. I also developed a backend application processing app to allow tellers to review the submitted applications and complete signup.

Technologies:

- PHP (Laravel)
- Vue.js
- AWS (S3)

My Comeback (2015)

<https://mycomeback.arizonafederal.org>

I created a contest website for credit union members to learn about managing their finances.

Technologies:

- PHP (Laravel)
- Vue.js
- AWS (S3)
